25 November 2015

Dear Ross

We are delighted and most grateful that you have been able to guide Fiona and Tony through the process of building at 166 Harts Road.

The conversion of Fiona's aspirations for a challenging site into a very workable and charming design is a feat of imagination, persuasion, compromise and endurance. Not that we should have been surprised, given your achievement for us at Castile Street.

We were constantly in admiration of the skill and ingenuity of the Steves and their abilities to complete the job with a minimum of disturbance to the neighbours, and even persuading the Council on the matter of a street tree. Their continual thinking about the best way to solve each problem was a treat to observe. Both the quality of the finish and the underlying build should make the home as easy to live in as it is to look at.

The number of people we have seen stopping to look at the house at all stages of construction shows that you have achieved something that is attractive not only to Fiona and Tony, but many others.

You must feel like an old schoolmaster who has taught two generations from the same family, but we appreciate greatly that you have been able to give Fiona and Tony the same degree of pleasure in building that you gave us.

With thanks and best wishes to all the team,

Yours sincerely

David & Jill
